

# SKYWARD QUICK-START PACKAGE FOR ENTERPRISES

Skyward has assembled a one-stop-shop of the tools and training programs firms need to get value from drones right away.

Realize ROI Sooner | Improve Efficiency | Create a Culture of Safety

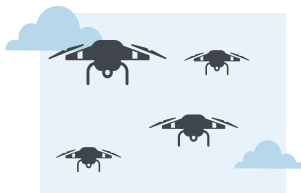

## How it works

### Week 1

#### **USE CASES & STANDARD OPERATING PROCEDURES**

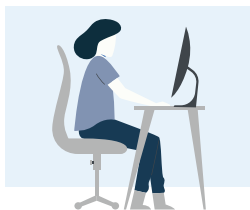

We'll assess your company's needs so we can customize in-person trainings for your industry and use cases. Our team will also consult with you on your company's standard operating procedures to ensure they are successfully implemented at your company — an essential component of your corporate culture of safety.

### Weeks 1-3

#### **DRONE PROVISIONING**

Skyward will provide your team with best-in-class drone kits including tablets and all needed accessories for field operations.

### Weeks 1-4

#### **SELF-PACED PART 107 TRAINING**

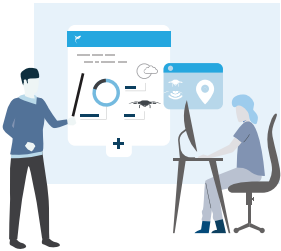

Prior to in-person training, your team will receive self-paced Part 107 instruction via Skyward partner Drone Pilot Ground School.

### Week 5

#### **INTRODUCTION TO THE SKYWARD PLATFORM**

We'll show you how to use the Skyward platform for airspace intelligence, fleet management, LAANC access, maintenance, and operational control.

### Weeks 6-8

#### **IN-PERSON OPERATOR TRAINING**

Encourage safe operations with ground and flight training on operating procedures and flying safely in a variety of scenarios, culminating in a real-world flight operation for your company.

#### **Three-day in-person training includes:**

**Day 1:** Knowledge — Safety, LAANC, Weather, Airspace, Emergencies, Skyward Software

**Day 2:** Knowledge & Flight Training — Know Your Drone, Operational Planning, Data Capture, Flight Basics

**Day 3:** Knowledge & Flight Training — Use Cases, Standard Operating Procedure Review, Skyward InFlight GCS and Mobile App, Automated Flight Systems

## Ongoing Support

Our friendly and expert Customer Success team will provide ongoing assistance for any questions that arise as you expand your use of drones.
