

# PHOTOGRAMMETRY TRAINING WITH SKYWARD

For pilots and program managers who need 3D models or orthomosaics, Skyward provides in-depth training for successful photogrammetry using the Skyward platform and compatible photogrammetry software.

## How We Help

### Realize Value Sooner

Skyward offers full-service training to take pilots from zero experience to producing high-value deliverables in a matter of weeks.

### Simplify Complexity

Our experienced drone professionals break down complex photogrammetry topics into practical knowledge and skills.

### Fly with Skyward

Plan, manage, and fly with the Skyward platform, and process the data with any major post-processing engine.

## What's Included

1-day training to learn how to create 3D models from 2D images

Image captured using Skyward's automated flight modes

3D processing with Metashape, Pix4D or your engine of choice

Onsite | Remote Training | Both

Skyward's expert consultants will meet you where you are, providing in-person, online training or hybrid sessions.
